Claim Objections

1. Claim 5 is objected to because of the following informalities: on line 3, apparently the word 'with' should be inserted after the word 'angle'. Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Govari (6,223,066) in view of Shlomo (6,272,371).

Govari teaches two fiber optics 30,40, where one is connected to a magnetic field sensor 22. However, the patent does not explicitly teach the use of a coil to detect magnetic radiation. Shlomo teaches the use of such a coil in order to detect an external magnetic field. It would have been obvious to use a coil since such has been shown to be well known in the art for its effectiveness in sensing magnetic fields, (see col. 6, lines 23+).

Allowable Subject Matter

4. Claims 7-48 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
